							Email Tuesday July 31/August 19 2018. Experienced flooding during the severe storm in July. Notes that Pioneer drive was recently repaved, and believes that this may have contributed to the flooding issue. Also notes that they are at a low point within the subdivision, and have witnessed erosion of the hill from higher areas of the subdivision. B. Lima responded on August 7th, and noted that the recent construction did not raise the road profile or curb lines. Recent storm was well beyond the 100 year storm event for which the storm sewers are designed. emailed Aug 19th to inquire about the design of the stormwater management measures for the subdivision, and if measures have/can be taken to mitigate impacts of the construction of houses/impervious surfaces on downstream properties.
